

DEL GRANDE NINCI

ASSOCIAZI | 1964

Who we are

DEL GRANDE NINCI Associati was born as “**Studio Consulenza Aziendale Lucchesi & Del Grande**”. It has been operating since the first half of the sixties in the field of tax, corporate and management consulting. Initially, the services offered were linked to tax system, as well as to accounting and financial reporting issues; with a constantly evolving market and an increase in customer demand, these activities were flanked by those of corporate reorganization, generational changeover, cost analysis and management control, drafting of industrial and financial plans.

The team is currently composed of the four partners and a staff of 14 people, each one with a specific qualification.

The firm is connected to one of the main labor consultancy firm in Tuscany; also collaborates, for certain matters, with leading law firms and university professors.

Since 2022 the firm has been part of «**Harpalis**», a network of selected firms of layers, chartered accountants and labour consultants present in the national territory, aimed at creating an ecosystem of professionals specialised in different sectors in order to respond in an integrated way to the needs of companies.

Mission

Ensuring tax, corporate and management consulting services with dynamism, efficiency and quality. Closely follow the customer in particular moments of business life, from the start up, to the different phases of development and crisis, from extraordinary events, including generational handover, to external networks.

Vision

Creating value for customers, supporting them in growth, even internationally, and imparting them skills. Maintaining a high standard of service, through specialization of the various internal professionals and experience, originating from over fifty years of activity.

Charte of Values

- Respect for customers, suppliers and any other external parties with whom we come in contact
- Strict confidence on the information learned while working (practices and clients) and on working methods
- Absolute transparency with customers and third parties in general
- Maintaining adequate skills in relation to the tasks assigned
- Meticulous tasks execution from a formal and substantial point of view
- Tasks execution meeting the deadline given by the customer/in accordance with the times agreed with the customer
- Maintaining maximum efficiency in the tasks execution through the enhancement of the existing organization
- Respect for the external environment.
